HEALTHY, hardy stock and fair dealing are the principles on which this business was founded in 1880. We feel especially grateful for the confidence and support of those whom we have numbered as our regular customers since we started—also to the thousands whom we have had the pleasure of serving in the years that followed.

The most gratifying part has been not only in the amount of business we were able to do, but also in the many letters we have received from our customers each day, **praising the high quality and good root system of our stock**, careful packing and the good condition in which the stock was received. We promise for the future the same fair methods, superior high grade stock and careful, courteous consideration which have made us a leader among the nurseries of the United States.

We have always realized the difficulty of most fruit tree buyers—that they cannot tell by looking at a tree whether or not it will produce the kind of fruit wanted. Feeling certain that buyers would appreciate the protection it gives, many years ago we adopted the **positive guarantee that every tree sold by us must produce fruit true to name**.

We realize, too, that the buyer is at a great disadvantage because the price he pays for fruit trees is absolutely no indication of their quality. You can buy trees from an agent and pay his extra profit, which makes the trees very high priced, yet, this does not mean that they are good trees.

You can buy direct from a nursery that does not grow all the trees it sells and take chances of getting what you order; or from a small, unknown concern whose price is no indication of the grade of trees—low, medium or high.

We cordially invite you to visit our big nursery. You will find conditions very good here. We grow all our stock under most favorable circumstances and with the direct supervision of highly experienced men. This catalog is our only salesman. Therefore, our prices are low for the quality we guarantee. You can buy from us at a big saving and know for a certainty that you are getting the very best for your money.

We solicit correspondence and any information will be given to the best of our ability. Our advice is free and we take pleasure in giving our customers the benefit of our experience. This year, next year and for years to come we have a sincere desire to have you thoroughly pleased in all of your dealings with us.

Important Information

ORDER EARLY—As soon as this Catalog reaches you send in your complete order with definite shipping instructions. We will then set the trees aside for you awaiting the desired shipping time. If you prefer you can leave the time of shipment to us and we will ship so as to reach you at the best time for planting in your locality.

USE ORDER SHEET—Please make your order out on order sheet enclosed. To avoid mistakes and delay write letters on a separate sheet of paper.

SEND CASH WITH ORDER—It is our cash with order—direct from nursery to planter—method of doing business that enables us to sell trees of the highest quality at such extremely low prices. Remittances should be made by post office or express money order, bank draft or registered letter. To large buyers, when satisfactory reference is given, we will ship C. O. D. provided one-fourth the amount of order is sent in cash when order is placed.

BOXING AND PACKING FREE—We make no charge for boxing or packing. Prices are f. o. b. cars at Dansville.

QUANTITY RATES—Less than ten trees at each rates. Ten to fifty trees at ten rates. Fifty trees or more at hundred rates.

PLANTING SEASON—Trees can be planted any time during their dormant period. We ship all Winter to Southern states, but our regular Spring shipping season opens about the first of March and continues well into June. Fall planting season begins about October 15th and extends until ground freezes solid.

SATISFACTION GUARANTEED—We guarantee every tree or bush to be up to grade specified or better. We also guarantee arrival to customer in first class condition. If through delay or mishandling in transit, trees or bushes are not in first class condition on arrival, and customers will notify us immediately, we will make prompt and satisfactory adjustment.

DELIVERY SERVICE

Where orders are large enough to justify it, our trucks will make free delivery to your farms. There is no delay in transportation, and the stock reaches you within 24 hours after it is dug or taken from our modern cold storage. Write for details.

WE STRIVE TO AVOID MISTAKES

But in the event that any nursery stock sold by us should prove untrue to name under which it is sold, we hereby agree, on proper proof of such untruth to name, to replace the original order or to refund the purchase price.

Kelly's Inspected Apple Trees

As we all know, Apples are one of the most useful fruits grown. There is always a demand for them on the market and prices are generally good. We have some very fine trees for delivery this year, with plenty of fine fibrous roots—the best that can be found anywhere. They are all True to Name, and we are sure their quality will satisfy you. Whether you have room for only a few trees in your yard, or contemplate planting an orchard, you should try Kelly's Apple Trees. We list below all the leading varieties—varieties that cover a long ripening season and which are fully recommended.

PROFESSOR FRENCH SAYS

Kelly Trees are True to Name

This year Professor A. P. French and his assistant of the Massachusetts Agricultural Experiment Station inspected all our Apple trees for trueness to name. You will find herewith a letter from him verifying this statement.

To you, both our old and new customers, this means that no matter what variety of Apple tree you care to order, you can be sure of having it True to Name when it comes into bearing. There is nothing more important than this, when you have spent time and money raising a tree to the time of its producing fruit.

Lewiston, N. Y.,
May 20, 1938.

Kelly Bros. Nurseries,
Dansville, N. Y.

Gentlemen:

I received the fruit trees and I appreciate the prompt delivery and also the fine quality of the trees.

Yours truly,
H. MT. PLEASANT

Statement of Inspection

October 11, 1938

To Whom It May Concern:

This is to state that we have examined for trueness to name all the salable apple and sweet cherry stock now growing in the nurseries of Kelly Brothers Nurseries near Dansville, New York, and as they now stand in the nursery row all varieties are, to the best of our knowledge and belief, true to name.

A. P. FRENCH O. C. ROBERTS
Professor of Pomology Assistant Professor
and Plant Breeding of Pomology

Kelly's Certified Apple Trees

In addition to inspecting for trueness to name all of Kelly Brothers Apple Trees, Dr. J. K. Shaw has attached to some trees of each of the leading commercial varieties the Official Certification Tag of the Massachusetts Fruit Growers' Association. This tag bears on its face the name of the variety of fruit the tree is certified to bear and on the reverse side, the official stamp of the Massachusetts Fruit Growers' Association.

Owing to the cost of attaching Certification Tags, we are obliged to make a slight additional charge for trees with Certification Tags attached.

R. I. Greening

Stuyvesant Falls, N. Y.,
May 21, 1938.

Kelly Brother Nurseries,
Dansville, N. Y.

Gentlemen:

Those 300 McIntosh trees came and were set today. They are beautiful trees, a credit to you and a satisfaction to me. Due to your careful storage and packing, they arrived in good condition in spite of it being so late in the season, and their long delay in transportation.

The McIntosh I bought from you twenty-one years ago, have been a life-saver during these depression years. These I hope will assure me a comfortable old age.

Yours very truly,

E. W. MITCHELL

The above illustration shows Mr. William F. Kelly and Mr. John W. Kelly in a block of 1 yr. apple trees. They are extra large, 5 to 6 foot trees, about $\frac{11}{16}$ in. caliper, with nice, clean straight bodies and an abundance of healthy fibrous roots.

We recommend the planting of one year apple trees. They stand transplanting better, make a quicker start and a more vigorous growth the first year or two and at the end of three or four years they are fully the equal of 2 year old trees set at the same time.

Summer Varieties

EARLY McINTOSH—A handsome new early red apple of exceptionally fine flavor and high quality. Trees are vigorous, hardy, healthy, productive and bear annually. Excellent for roadside markets and home use. Ripens in August.

EARLY HARVEST—Large pale yellow apple of fine flavor. Good bearer. August.

GOLDEN SWEET—Large, pale yellow, very sweet. August.

MELBA—A new McIntosh seedling from Canada. Fruit bright crimson. Season a little ahead of Early McIntosh. Good for home use and roadside markets.

RED ASTRACHAN—Tree hardy and good bearer. Fruit very handsome, large, round, nearly covered with deep crimson, overspread with thick bloom; juicy and good, though rather acid; one of the best of the summer varieties for cooking. Ripens in August.

SWEET BOUGH—Large, pale yellow, sweet. Abundant bearer. One of the best sweet apples. August.

YELLOW TRANSPARENT—The best early yellow apple. Excellent flavor. Trees hardy and abundant bearers. August.

NEW VARIETIES

All the varieties of fruit trees we offer have been tried and tested and proven to be commercial successes. While we like to offer new varieties, we do not do so until we are sure they merit large scale commercial planting. Too many orchardists have been practically ruined by heavily planting varieties they knew little or nothing about. If you have a new variety or special type you would like to grow, write us and we will arrange to propagate them for you.

Autumn Varieties

FALL PIPPIN—Very large, yellow and juicy. Excellent for cooking. Hardy and productive. October to December.

FAMEUSE (Snow Apple)—Medium size, crimson with snow white flesh. Excellent quality. One of the finest dessert fruits and valuable for market. November.

MAMMOTH BLACK TWIG—Large deep red late keeping winter apple of good quality. December to May.

MILTON—A very handsome new apple of the McIntosh type. Fruit a beautiful pinkish red with tender, crisp, white flesh of excellent flavor. Tree hardy, vigorous, and an annual bearer. Ripens a month ahead of McIntosh.

POUND SWEET (Pumpkin Sweet)—Large yellow russetted apple. Very sweet. October and November.

RED DUCHESS—Red sport of Duchess. Bears at an early age, good size, juicy, subacid. Very hardy. September.

RED GRAVENSTEIN—A new red sport, much more attractive than its parent. Differs from the old Gravenstein only in the solid dark red color of the fruit. Should be planted in place of Gravenstein.

WEALTHY—Beautiful, brilliant red apple of fine quality. Exceptionally hardy and an early bearer. Excellent filler. Its hardiness makes it adaptable to cold climates. October to January.

WOLF RIVER—Very large, yellow striped with bright crimson. Excellent for cooking and a long keeper. September to December.

Winter Varieties

BALDWIN—Well-known old variety. One of the best winter apples. Tree is a vigorous grower and the fruit is large, bright red, juicy and rich. November to April.

BEN DAVIS—Medium to large, bright red, fair quality. Excellent keeper. January to June.

CORTLAND—A comparatively new apple of the McIntosh type that combines the high quality and flavor of the McIntosh, the ability to stand handling of the Baldwin and ability to hang to the tree of the Ben Davis. Should be planted extensively. An excellent variety to plant with McIntosh as a cross pollinator. The best apple introduction of the twentieth century. November to February.

R. R. 1, Box 411, La Porte, Ind.,
Jan. 28 1938.

Kelly Bros. Nurseries, Dansville, N. Y.
Gentlemen:

I bought 50 Cortland apple trees from you eight years ago. They were the best I ever bought and are bearing good.

Yours truly,
PHILIP ANDERSON

SCIONS FROM BEARING ORCHARDS

Each year we cut a large percentage of our buds from bearing trees. By careful observation our experts select those trees that make the best growth and produce the highest colored fruit. You are thus assured of the best strains of fruit when you buy Kelly's trees.

Cortland

DELICIOUS—A large dark red apple with crisp, fine grained flesh of excellent quality and flavor. Hardy, vigorous and an annual bearer. Splendid keeper and shipper. December to February.

DOUBLE RED DELICIOUS—A very fine colored, solid red strain of Delicious resembling its parent in all characteristics except color.

Yellow Delicious

GANO (Black Ben Davis)—

Large, dark red. Early bearer and good keeper. January to June.

GALLIA BEAUTY—An improved solid red Rome Beauty. Same shape and texture with equal or better quality.

GOLDEN RUSSET—Attractive, yellow russetted apple. Long keeper. Tree a vigorous grower. November to April.

GRIMES GOLDEN—Large golden yellow. Good quality. December to April.

HUBBARDSTON—Yellow and red striped. Early bearer. Strong grower. Bears well every year. November to March.

JONATHAN—Beautiful red apple of excellent quality. Productive and an early bearer. November to April.

Red Rome

KENDALL—A new McIntosh seedling introduced and recommended by the New York State Experimental Station. Handsomely colored solid dark red. Fruit large with fine grained whitish flesh. Excellent quality and flavor. Ripens about the same time as McIntosh. Productive and a good keeper. October.

KING—Large attractive red apple. November to March.

McINTOSH RED (Solid Red Strain)

A very attractive red apple of the highest quality. Hardy, bears young and annually. A leading, profitable, commercial sort for New York and New England. Productive. October to January.

MACOUN

A late McIntosh type apple ripening about ten days later than McIntosh. Dark red with whitish close grained flesh. Fine quality. A heavy and regular bearer. Introduced and recommended by the New York State Experimental Station. November.

MEDINA—An improved Delicious, ripening later and prolonging the season of that variety. Larger and more attractive than Delicious.

NORTHERN SPY—A leading commercial variety. Fruit is large and very attractive, being of bright red color with a delicious bloom. Flesh is juicy, crisp and excellent for dessert or culinary uses. November to April.

ORLEANS—Another apple of the Delicious type. Ripening about the same time as Delicious, but a longer keeper, more attractive and larger fruit. Bears early, annually and heavily and is resistant to scab.

RHODE ISLAND GREENING—Large, yellowish-green apple of fine quality. An abundant yielder and excellent keeper. One of the leading commercial sorts. November to March.

RAMBO—Red and yellow. Hardy and productive. October to December.

RED SPY—A new red sport identical with Northern Spy except that the fruit is a solid bright red without either stripe or splashes. Much handsomer than its parent. An excellent commercial sort. Tree is hardy and productive.

Double
Red
Delicious

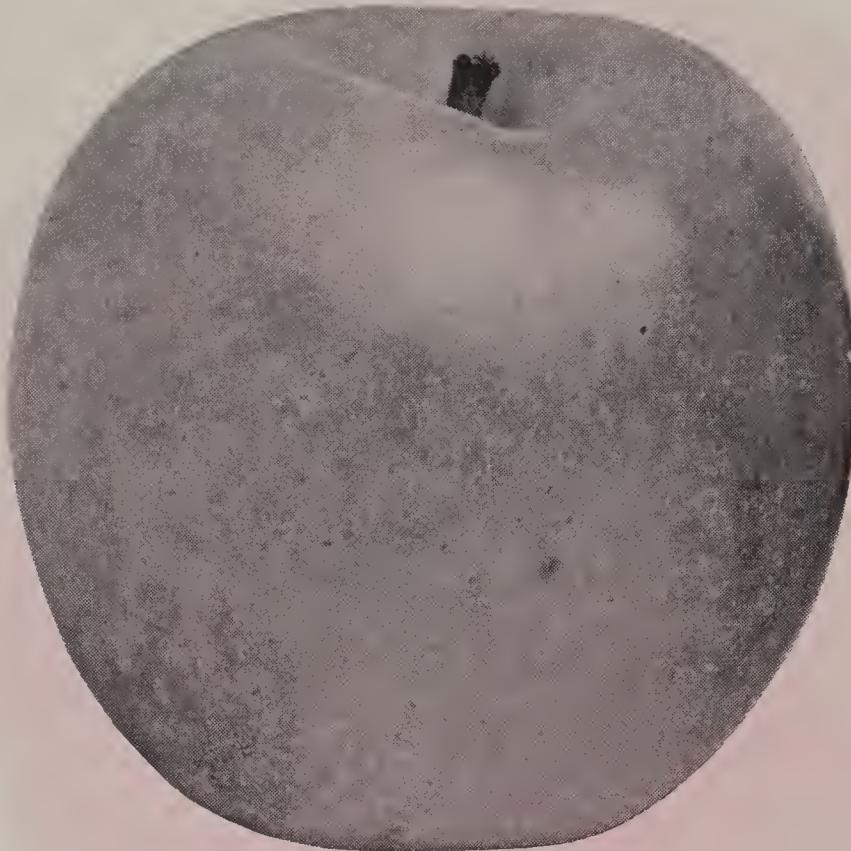

NORTHWESTERN GREENING—Tree a splendid vigorous grower, quite hardy. Fruit large green, becoming yellowish green when ripe. Sub-acid flavor. October to March.

OLD WINESAP—Medium size dark red apple of good quality. Bears early, abundantly and regularly. December.

OPALESCENT—Very handsome, large, dark crimson apple. December to March.

Hyslop Crab Apples

R. I. Greening

ROME BEAUTY—Yellow and red striped apple of excellent quality. Prolific annual bearer. Early bearer and good keeper. Profitable commercial sort for New York, Ohio, Pa., and W. Va. December to May.

RED ROME—Another new red sport of Rome Beauty, and like Gallia Beauty is identical with its parent in all characteristics except fruit is a solid red color.

ROXBURY RUSSET—Yellow, russetted apple of excellent quality. December to June.

YELLOW DELICIOUS—A bright golden yellow apple of excellent quality. Firm, crisp and very juicy. Splendid keeper. October to April.

SMOKEHOUSE—Yellow, mottled with dark red. A fine flavored dessert apple. October to March.

SPECIAL PRICE \$2.50

Holderness, N. H.

Kelly Brothers Nurseries,
Dansville, N. Y.

Gentlemen:

It may interest you to know that twelve or thirteen years ago we bought 750 McIntosh trees from you and they have been coming into bearing during the past two or three years. Up to the present time every one is true to name, producing an unusually fine red apple.

We feel highly gratified to find that we have a strain with a dark red color. Some of our neighbors who bought from other nurseries have a strain that is not nearly so highly colored, therefore we want to congratulate and thank you.

Yours very truly,
HENRY P. DAUGHERTY

SPITZENBURG—High flavored, dark red. November to April.

STARK—Large, red and yellow striped. Hardy. A reliable cropper and very productive. January to May.

STAYMAN'S WINESAP—Yellow striped with red. Excellent quality. Productive and an early bearer. Splendid late keeper. December to March.

SWEET DELICIOUS—One of the best winter sweets. Large and attractive in size, color and shape. November to January.

TOLMAN SWEET—Yellow tinged with red. Very sweet. Hardy and productive. November to April.

TWENTY OUNCE (Collamer)—Very large, red and yellow striped. October to January. *Can furnish one year trees only.*

WAGENER—A bright light red apple of excellent quality. Very productive. October to January.

WINTER BANANA—Beautiful pale yellow apple with bright pinkish blush. Excellent quality. Prolific and an early bearer. November to March.

YORK IMPERIAL—Yellow striped with light red. Quality very good. Bears regularly and heavily. December to February.

CRAB APPLES

DOLGO CRAB—A handsome hardy red crab apple. Vigorous and productive. Very juicy, jellies easily, and makes a rich, ruby red jelly of beautiful color and excellent flavor. Makes exceptionally good cider. Early September.

HYSLOP—Large, brilliant dark red. Hardy, reliable cropper. September and October.

TRANSCENDENT—Bright yellow with bright red cheek. Productive. August and September.

NEW VARIETIES

Recommended by New York State Experiment Station. *Can furnish only in one year old trees.*

PRICES

One Year—Sturdy Buds—
3 to 5 ft.
75c each, 10 for \$6.00

LODI — Resembles Yellow Transparent, but the fruits are larger and ripen a little later. Annual bearer.

SWEET McINTOSH—Resembles McIntosh in appearance, flavor and aroma. Adapted for home use.

VISIT OUR NURSERIES

You are always welcome at our nurseries. DWARF APPLE TREES

The Dwarf Apple trees come into bearing much earlier than the Standard trees. Their low, broad heads are within reach so that the fruit can be easily picked. They can be planted 15 feet apart. Our Dwarf trees are budded on the new Malling dwarf rootstock introduced recently to the country by Dr. H. B. Tukey of the New York State Experimental Station.

VARIETIES—Cortland, McIntosh Red, R. I. Greening, Red Rome.

Kelly's Peach Trees

This year we are offering some of the finest Peach trees we have ever grown, at prices you cannot afford to pass up. Our trees are strong and healthy with a good fibrous root system, and can absolutely be depended upon to be true to name. We cut our buds from bearing orchards and exercise the greatest care in keeping our varieties free from any possible mixtures. For bigger profits it will pay you to plant Kelly's Peaches.

Write for Prices in Larger Quantities

Golden Jubilee

An introduction of the New Jersey Experiment Station which we highly recommend. Although comparatively new, it has been widely planted and has proven a real money maker.

HARDY

The tree is unusually hardy and resists excessive cold. A sure cropper after severe winters and heavy frosts at blooming time. Ripens a few days ahead of Carman.

FRUIT OF GOOD SIZE AND QUALITY

Golden Jubilee stands without an equal as an early, large, yellow freestone of the highest quality. Flesh is yellow, tender, juicy, and sweet. No commercial orchard planting is complete without Golden Jubilee.

NOTE OUR SPECIAL LOW PRICES

Kelly's Peach Trees

VARIETIES LISTED IN ORDER OF RIPENING

Season Given is That of Western
New York

MIKADO—The most popular very early yellow. Hardy, productive. Ripens about six weeks ahead of Elberta. Blossoms self-sterile, needs to be interplanted. Early August.

GREENSBORO — Large, bright red over yellow, flesh white. Good quality. Freestone. Late August.

MARIGOLD—Early yellow, excellent quality, semi-cling. Late August.

ORIOLE—A new early peach of high quality. Fruit medium to large in size, yellow fleshed, and a freestone. Trees vigorous and productive. Early September.

GOLDEN JUBILEE—See opposite page for description.

CUMBERLAND—A recent introduction of the New Jersey Experiment Station as a result of a cross between Belle and Greensboro. Vigorous grower and as hardy as Carman. Fruit is large, attractive in color and shape. Flesh is white and almost free.

Valiant

Suffern, N. Y., Feb. 22., 1938

Kelly Brothers Nurseries, Dansville, N. Y.

Gentlemen:

Six years ago this Spring I ordered some South Haven Peach trees. Every one got a good start. They had peaches on the fourth year. No peach like them for flavor for canning.

Yours truly, ANDREW HARSH

South Haven

KELLY'S PEACHES FOR PROFIT

We believe that the Peach industry faces a bright and profitable future. During the past few years, because of fewer new plantings, the number of bearing trees has shown an amazing decrease. Progressive fruit growers will grasp this opportunity and plant Kelly's Peaches this year. No planting will be complete without some of the newer varieties—Cumberland, Valiant, Veteran, Vedette, Marigold, Oriole and Golden Jubilee. These varieties are very promising and are deserving of trial plantings.

CARMAN—Large, white fleshed peach of fine quality. Very hardy and productive. Freestone. Early September

ROCHESTER—A comparatively new extra early peach of the highest quality and most delicious flavor. Large yellow, with attractive red blush. A very fine canner, prolific and an early bearer. Freestone. Early September.

VEDETTE—Ripens a few days before Valiant, and three weeks before Elberta. Fruit is large, roundish oval, yellow fleshed, and a freestone. Superior quality and color. Early September.

**Commercial Orchardists Write us for
Special Prices on Large Quantities.**

VALIANT—Large, yellow, freestone, juicy, very good quality. Productive. Early September.

SOUTH HAVEN—Another excellent new peach well worth planting. Golden yellow with red blush. Large, meaty and of delicious flavor. Prolific. Freestone. Early September.

HALE-HAVEN—A splendid large new yellow freestone peach and exceptionally good color and flavor. Exceptionally hardy and productive. Early September.

HILEY BELLE—Large white peach with bright red cheek. Rich and juicy. Excellent shipper. Freestone. Early September.

VETERAN—Large, round, yellow fleshed fruit. Freestone. Since it ripens a few days later than Valiant, it makes a desirable sort to follow that variety. Early September.

FITZGERALD—Very hardy. Large, brilliant yellow with red cheek. Early bearer. Freestone. Middle September.

CHAMPION—Large creamy white with red cheek. Excellent quality. Good shipper. Hardy and productive. Freestone. Middle September.

BELLE OF GEORGIA—Large, attractive white fleshed peach. Red cheek. Hardy and productive. Freestone. Middle of September.

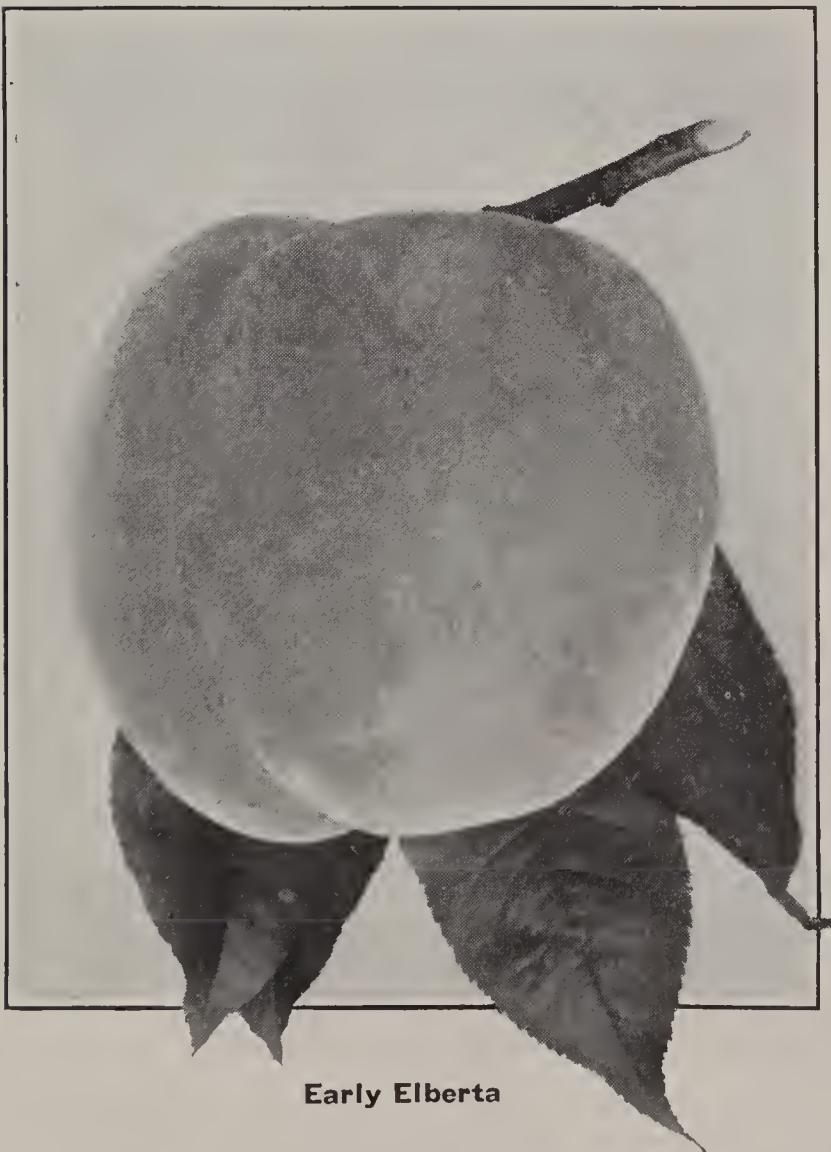

CRAWFORD'S EARLY—Large yellow peach of the finest quality and flavor. Freestone. Middle of September.

EARLY ELBERTA—An excellent new variety resembling Elberta very closely, except a little rounder in shape and about ten days earlier in ripening. Freestone. Middle of September.

ELBERTA, THE MONEY MAKER

The leader of all peaches and the greatest commercial variety on the market; 50 per cent of the peaches planted are Elberta. In all probability no peach will succeed over so wide a range of territory as this kind. It will thrive where any peach can be grown. A beautiful peach of good quality, not only the best orchard variety but also valuable for planting in the garden. Elberta is hardier in bud than many varieties, therefore, a more uniform cropper. It is large, yellow, with red cheek, juicy and high flavor; flesh yellow, free stone. Season medium early, following quick upon Early Crawford. Early September.

HARRIS—A hardy English sort. Medium size; oblong, orange, good quality, very early. One of the best varieties in the East. July.

MOORPARK—Very large, deep yellow with red cheek. Has the highest quality and finest flavor of all apricots. August.

QUETTA (NECTARINE)—Recently introduced for trial in the East. Fruit large, highly colored red, white flesh, clingstone. August.

Moorpark Apricot

TREES ARE SCIENTIFICALLY PROPAGATED

You realize that it takes many years of careful, scientific experimenting to produce the best tree in every variety. Our nursery here has been engaged in this pioneering work for you for the past fifty-nine years. Each tree we have to offer you is of the very highest grade in its own particular variety.

This scientific propagation is still going on in the most practical ways, and you can be certain that Kelly trees, besides bearing true to name fruit, will give best results. We are always looking ahead and working toward an ideal, and you know before you order that the stock you buy from us is as near the ideal as we can possibly make it.

Large Montmorency

Sour Cherry Trees

We are one of the largest producers of Cherry trees in the United States. Fifty-nine years' experience—ideal soil and climatic conditions all combine to produce the finest to be had in Cherry trees. Our Cherries are all upland grown, thus assuring a healthy, vigorous root system. Cherry trees require a well drained soil.

PRICES OF SOUR CHERRY TREES ON MAHALEB ROOTS

1 Year	3 ft. and up Sturdy Buds.....	.65	5.50	40.00

DYEHOUSE—Ripens a week ahead of Early Richmond. The earliest good sour cherry. Early June.

EARLY RICHMOND—Exceedingly hardy and productive. Ripens through June.

ENGLISH MORELLO—Large, blackish red cherry ripening in July. Hardy and productive.

LARGE MONTMORENCY—By far the leading commercial variety. Good grower, very productive, and an excellent shipper. Bright, clear attractive red. Ripens 10 days after Early Richmond. Late June.

MAY DUKE—A very early dark red cherry of good quality. Very hardy. June.

OSTHEIM—Large, dark red. Almost sweet. Hardy. Late July.

Large Montmorency

Scarsdale, N. Y., April 22nd, 1938.

Kelly Brothers Nurseries, Dansville, N. Y.

Gentlemen:

We are indeed pleased with the fruit trees from you that we planted a year ago. The sour cherries are ready to bloom, and all trees are in fine shape.

Yours very truly,

MRS. VICTOR POSAR

Napoleon

Windsor

Sweet Cherry Trees

We strongly recommend the planting of one year old Sweet Cherry trees. We know from fifty-nine years' experience that one year old cherries transplant much more successfully than two year old trees. Having a more complete root system in proportion to the top, they withstand the shock of transplanting better, make an earlier start and a much more vigorous growth the first two or three years after planting.

PRICES OF SWEET CHERRY TREES ON MAHALEB ROOTS

			Each	Ten	Hundred
2 Year	5 to 7 ft.	3/4 and up.....	\$.70	\$ 6.00	\$ 45.00
2 Year	4 to 5 ft.	5/8 to 3/4.....	.65	5.50	40.00
2 Year	3 to 4 ft.	1/2 to 5/8.....	.60	5.00	35.00
1 Year	4 to 5 ft.	Sturdy Buds.....	.65	5.50	40.00

BLACK TARTARIAN—Very large, bright purplish black. Juicy and rich. An immense bearer. June.

BING—Large, dark brown, of fine quality. Hardy and vigorous. July.

GOVERNOR WOOD—Large, yellow marbled with light red. Sweet and rich. Productive. June.

LAMBERT—Very large, purplish red. Firm and rich. Very productive. Late July.

NAPOLEON (Royal Ann)—Beautiful cherry of large size, pale yellow with bright red cheek. Flesh firm, juicy and sweet. One of the best for market and canning. July

SCHMIDT'S BIGGAREAU—Very large, deep mahogany color. Very juicy. July.

WINDSOR—Fruit large, liver colored, distinct flesh, firm and of high quality. Tree is vigorous and very productive. July.

YELLOW SPANISH—Pale yellow with bright red cheek. Productive. June.

We can furnish the following varieties in one-year old trees on Mazzard roots:

Napoleon

Schmidt's Biggareau

Windsor

Kelly's Standard Pear Trees

The Pear trees we are offering this year are some of the finest we have ever grown. No home orchard is complete without several Pear trees. We recommend the following varieties.

PRICES OF STANDARD PEAR TREES

			Each	Ten	Hundred
2 Year	5 to 7 ft.	3/4 and up	\$.75	\$6.00	\$50.00
2 Year	4 to 5 ft.	5/8 to 3/4	.65	5.00	40.00
2 Year	3 to 4 ft.	1/2 to 5/8	.55	4.00	30.00
1 Year	3 to 5 ft.	Sturdy Buds	.60	5.00	35.00

ANJOU—Large, green to yellowish in color. Excellent quality. Hardy and productive. October to January.

BARLETT—Justly the leading commercial pear. Large golden yellow with reddish blush. Tender, melting and juicy. September.

BEURRE BOSC—Very large, gourd shaped pear, brownish yellow in color. Delicious flavor. Very productive. October.

CLAPP'S FAVORITE—Large, pale lemon yellow with brown dots. Rich and sweet. Early August.

DUCHESS D'ANGOULEME—Very large, greenish-yellow, russetted. Early bearer and very productive. October to November.

FLEMISH BEAUTY—Large, russetted pale yellow. Exceptionally good quality. September and October.

KIEFFER—Very large, yellow with vermillion cheek. Flesh brittle, very juicy, with marked musky aroma; good quality. Very vigorous and productive. October to November.

LAWRENCE—Large, yellow covered with brown spots. Hardy and productive. November to January.

SECKEL—Very delicious and of excellent quality. Yellowish-brown with red cheek. Buttery and spicy. Very productive. August to October.

SHELDON—Large, round, russet and red pear. Very rich and delicious. October.

VERMONT BEAUTY—Medium, yellow shaded with carmine. Good cropper. October.

WORDEN SECKEL—Larger than Seckel. Yellowish-brown with red cheek. Excellent quality. Bears early and is very productive. September to October.

NEW VARIETIES

Introduced and recommended by the New York State Experimental Station.

Prices—One Year—Sturdy Buds—4 to 5 ft.
75c each, 10 for \$6.00, 100 for \$50.00

CAYUGA—A seedling of Seckel which it resembles in shape and color. Fruit is as large as Bartlett and of high quality.

GORHAM—Resembles Bartlett in size, color, and shape. The flavor is sweet and vinous with a very marked and pleasing aroma. Trees vigorous and productive. Fruit ripens two weeks after Bartlett.

WILLARD—One of the best winter pears. Recommended for high quality and lateness. Shape and color of Bartlett. Flesh is yellowish fine grained, tender and juicy.

DWARF PEAR TREES

			Each	Ten
2 Year	4 to 5 ft.	5/8 and up	\$.65	\$5.00
2 Year	3 to 4 ft.	1/2 to 5/8	.60	4.00

Ideal for home orchard. Require little room—bear early—fruit easy to pick.

We offer only the following four varieties:

Bartlett, Clapp's Favorite, Duchess, Seckel.

QUANTITY RATES—Less than ten trees at each rates. Ten to fifty trees at ten rates. Fifty trees or more at hundred rates.

Clapp's Favorite Pears

Kelly's Plum Trees

In general Plum Trees do best on a heavy soil. All our Plums are budded on Myrobalan Stock.

2 Year	5 to 7 ft.	$\frac{3}{4}$ and up
2 Year	4 to 5 ft.	$\frac{5}{8}$ to $\frac{3}{4}$
2 Year	3 to 4 ft.	$\frac{1}{2}$ to $\frac{5}{8}$
1 Year	3 to 5 ft.	Sturdy Buds

Each	Ten	Hundred
\$.75	\$ 6.00	\$ 45.00
.65	5.00	40.00
.50	4.00	35.00
.65	5.00	40.00

JAPANESE VARIETIES

ABUNDANCE—A large, very early, bright cherry red plum with white bloom. Juicy and delicious. August.

BURBANK—Very large, bright reddish purple. Enormously productive. Excellent shipper. August.

RED JUNE—Large, deep vermillion red. Juicy and of good quality. Early August.

SATSUMA—Large, globular with sharp point. Purple and red. Flesh dark red, juicy. Late.

WICKSON—Deep maroon-red covered with white bloom. Delicious. Excellent shipper. Early September.

EUROPEAN VARIETIES

BRADSHAW—Large, dark violet red, juicy and good. Early. August.

GRAND DUKE—Large, dark violet red. Last of September.

IMPERIAL GAGE—Large, greenish yellow. Very productive. August.

LOMBARD—Medium, dark red. Hardy. August.

MONARCH—Very large, bluish purple. Bears young. September.

REINE CLAUDE (Bavay's Green Gage)—

Large, pale yellow marked with red. Fine quality. Middle of September.

Fellemburg Prune

SHIPPER'S PRIDE—Large, dark purple. Excellent for canning. September.

SHROPSHIRE DAMSON—A delicious little plum much esteemed for canning. Dark purple. Enormously productive. October.

YELLOW EGG—Golden yellow covered with thick bloom. Very productive. September.

PRUNE TREES

2 Year	5 to 7 ft.	$\frac{3}{4}$ and up
2 Year	4 to 5 ft.	$\frac{5}{8}$ to $\frac{3}{4}$
2 Year	3 to 4 ft.	$\frac{1}{2}$ to $\frac{5}{8}$
1 Year	3 to 5 ft.	Sturdy Buds

Each	Ten	Hundred
\$.75	\$ 6.00	\$ 45.00
.65	5.00	40.00
.50	4.00	35.00
.65	5.00	40.00

FELLEMBURG PRUNE—Large, pointed and tapering. Dark purple. Juicy and delicious. Early September. Freestone.

GERMAN PRUNE—Fruit long, oval, purple with thick bloom. Flesh firm, sweet and delicious. Excellent commercial sort. September. Freestone.

YORK STATE PRUNE—One of the largest and best. Dark blue, with purple bloom. Delicious. Last week in September. Freestone.

STANLEY PRUNE—Introduced by the N. Y. State Experimental Station, and is becoming a valuable commercial variety. Large dark blue with thick bloom. Flesh greenish yellow, juicy, and sweet. Bears annually. Midseason.

QUINCE TREES

	Each	Ten	Hundred
2 Year 4 to 5 ft.			
5/8 and up.....	\$.75	\$ 6.00	\$ 50.00
2 Year 3 to 4 ft.			
1/2 to 5/8.....	.65	5.00	40.00

ORANGE—Early Midseason, juicy, mild sub-acid, quality very good. Leading commercial quince.

WAYNE COUNTY ORANGE—A superior new variety introduced largely through our efforts. Extra large, golden yellow, of excellent quality. Regular cropper. Ripens early September.

NUT TREES

BLACK WALNUT—Grows from 40 to 60 feet high. Large crops of nuts with rough hard shell containing rich, oily kernels of fine flavor. Trees 4 to 5 ft. high, **90 cents each**.

BUTTERNUT—Large longish nuts with sweet, oily, nutritious kernels. Trees 4 to 5 ft., **90 cents each**.

ENGLISH WALNUT—A fine lofty growing tree, producing large crops of thin shelled delicious nuts. Trees 3 to 4 ft. high, **\$1.10 each**.

Ten 2 Year No. 1 Vines \$1.60
(Worth \$2.35)

3 Concord	1 Delaware	1 Worden
2 Niagara	2 Catawba	1 Portland

SPECIAL \$1.60 PRICE

DELAWARE (Red)—Bunches and berries small. Light red, unusually sweet and delicious. Early.

DIAMOND (White)—The leading early white grape. Excellent quality.

FREDONIA (Black)—Recent introduction of N. Y. State Experimental Station. Medium cluster, berries large, flesh juicy. Ripens two weeks ahead of Worden. Highly recommended.

MOORE'S EARLY (Black)—Berries and bunches large. Black with blue bloom. Fine quality. Early.

NIAGARA (White)—The most popular white grape. Bunches and berries extra large. Vigorous, productive and a good keeper. Midseason.

PORTLAND (White)—Earliest white grape. Vigorous, hardy and very productive. Berries large and sweet.

WORDEN (Black)—A large early black grape of fine quality. Berries and bunches large.

Raspberries

A ready market can always be found for Raspberries. When well cared for they are sure to return a good profit. A patch of Raspberries should be renewed about once in five years, as by that time the quality of the berries deteriorates and the fruit becomes small. The plants should be well manured and cultivated at frequent intervals. We offer the following varieties:

PRICES (Except as Noted)

\$1.25 per 25, \$3.00 per 100, \$25.00 per 1000

CHIEF (Red)—The finest early red raspberry for general planting. Large, firm and a very heavy yielder. Ripens 10 days before Latham.

CUTHBERT (Red)—Large, crimson, hardy and prolific. Fine for market or garden. Excellent quality. Midseason.

CUMBERLAND (Black)—Large, glossy black, firm, of excellent quality. Hardy and productive. Early to Midseason.

COLUMBIAN (Purple)—A fine commercial sort. Vigorous, very productive, excellent canner. Fruit large, purple, firm. Midseason.

INDIAN SUMMER—New Everbearing Red Raspberry. Berries large, conical, much superior in quality and size to any of this type. Prices—\$1.75 per 25, \$6.00 per 100.

LATHAM (Red)—Large, round, firm, brilliant red. Most profitable commercial variety. Hardy, very prolific, an excellent shipper and a perfect variety for canning. Early. Ripens evenly over a very long season.

NEWBURG (Red)—A new variety of excellent color and quality. Very large and firm. Fine keeper and shipper. Vigorous, hardy and very productive. Three or four days earlier than Cuthbert.

PLUM FARMER (Black)—One of the best commercial sorts. Berries large, thick meated, firm. Very productive. Early Midseason.

ST. REGIS (Everbearing)—A bright crimson berry of excellent quality. Fruit commences to ripen with the earliest and continues to ripen on young canes until October.

SODUS—New Purple Raspberry from New York Experimental Station. Fruit is large, firm, medium purple color, and does not crumble. Plants hardy and very productive.

Prices—\$1.75 per 25, \$6.00 per 100.

TAYLOR—A new Red Raspberry introduced by the New York State Experimental Station. Plants are vigorous, hardy and productive. Long, conical shape, firm, thick flesh. Excellent quality, ripens just before Latham.

Prices—\$1.50 per 25, \$5.00 per 100.

BLACKBERRIES

PRICES

\$1.25 per 25, \$4.00 per 100, \$30.00 per 1000

BLOWERS—An upright mammoth grower. Very hardy and productive. Fruit very long, finest flavor and jet black. Fruits continuously July to September.

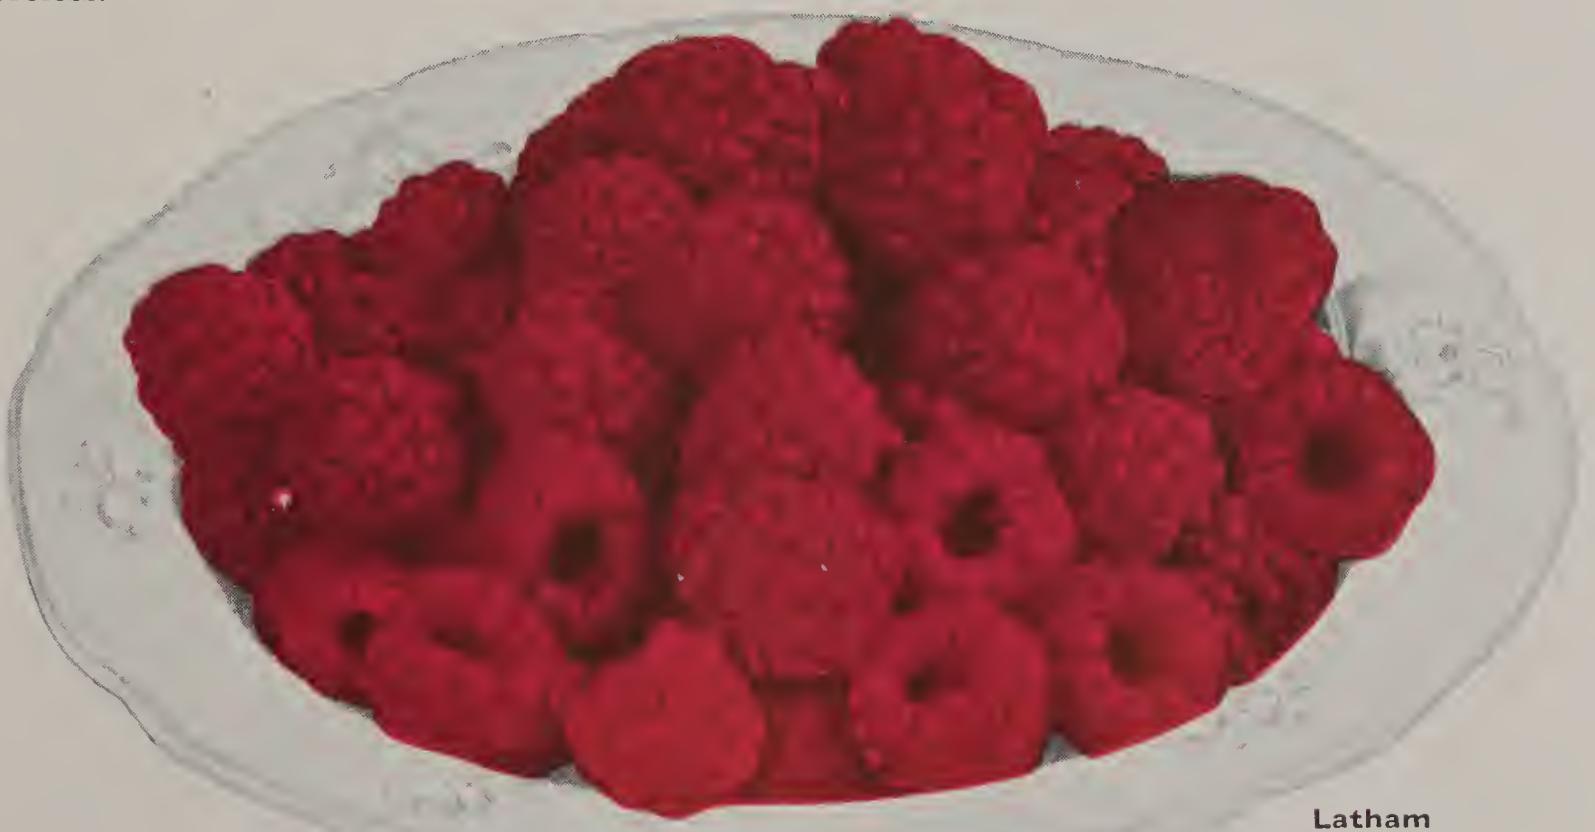

ELDORADO—The hardiest and sweetest blackberry. Berries are large, jet black, borne in large clusters, very sweet and practically coreless.

CURRENTS

PRICES—Extra Strong 2 year bushes, 30c each, \$2.50 per 10, \$15.00 per 100.

Write us for Special Prices on Large Quantities

WILDER—An unsurpassed commercial sort. Bunches and berries very large, bright attractive red. Hang on bushes well and of excellent quality. Productive.

Latham

Strawberries

PRICES—25 plants 50c, 50 plants 75c, 100 plants \$1.00, 500 plants \$4.50, 1000 plants \$8.00

All Strawberries sent Postpaid

The following two recent introductions of the U. S. Department of Agriculture, Dorsett and Fairfax, are considered by most strawberry growers as superior to other standard varieties both for home and commercial use.

DORSETT—An extra early self-pollinating offspring of Premier. Plants are large and healthy, withstanding drought, excessive rains and frost better than any other standard variety. Does well on poor soil. Berries large, evenly matured, light bright red. Excellent for market or home use.

FAIRFAX—Another excellent new variety, ripening early, about same time as Premier. Very vigorous and a fine plant maker. Withstands adverse conditions well and ripens evenly over a long period of ripening. Berries large and very attractive. Every strawberry grower should set Dorset and Fairfax.

Premier—An early, productive variety of unsurpassed quality. Vigorous and healthy.

CATSKILL—Plants large, very vigorous, yield very heavy crops. Berries very large, slightly irregular in shape, moderately firm, dark red, but glossy and attractive, mild subacid and good quality. Ripens in Midseason.

Fairfax Strawberry

Everbearing Varieties

PRICES—25 for 75c, 50 for \$1.25, 100 for \$2.00, 1000 for \$12.00

GEM—Very hardy, plants freely. Berry is dark red, large, sweetish tart flavor. Plants medium in size and immune to disease. Bears large crops until cold weather sets in.

MASTODON—Without question the finest of the Fall or Everbearing varieties. It produces an immense crop in June and an abundant crop in the fall. Most prolific of all the Fall varieties. Berries immense size, unusually good quality and color. Plants healthy, very strong growers. An exceedingly profitable variety.

ASPARAGUS

PRICES—Extra Strong 2 year, 60c per 25, \$1.75 per 100, \$10.00 per 1000

MARY WASHINGTON—A new government introduction, by far the best variety grown. Very strong grower, large size, productive and is rust-resistant.

RHUBARB—PIEPLANT

Prices of Extra Strong Two Year Roots:
20c each, \$1.75 per 10, \$10.00 per 100

MYATT'S LINNAEUS—The best known and most widely planted variety. Large, early, tender—not the least tough or stringy—with mild subacid flavor. Excellent for pies or sauce, and very desirable for canning. Plant 3 or 4 feet apart in rich garden soil.

Kelly's Trees Give Satisfaction Everywhere

Kaunas, 1938, May 3rd.
Daukanto g. 7, Lithuania

Messrs.

Kelly Brothers Nurseries,
Dansville, N. Y.

Dear Sirs,

We have duly received your invoice of this March 29th and also the trees sold to Mr. P. Rimkus.

We have the pleasure to inform you, that we are quite satisfied with the very good quality of the trees, and of the good state in which they reached our land.

We would be very glad to receive from you with the least possible delay some catalogs of your trees.

Yours very truly,
K. HELMKAL

GOOSEBERRIES

Plant in good rich soil 3 to 4 feet apart.

Prices of Extra Size Two Year Bushes: 35c each, \$3.00 per 10, \$20.00 per 100

DOWNING—A medium size whitish green gooseberry, of good quality. Strong, upright grower and quite prolific. Midseason.

RED JACKET—JOSSLYN—Light red, medium size, excellent quality. Vigorous upright grower, healthy and productive. Early.

Kelly's Flowering Shrubs

PRICES (Except as Noted)—Strong Two Year Bushes, 2 to 3 ft., 35c each, \$3.00 per 10

ALMOND (Prunus Glandulosa)—A beautiful erect growing shrub reaching a height of 4 to 5 feet. Very attractive in May with its dainty double pink blossoms, which cover the branches in a cloud of bloom.

ALTHEA (Rose of Sharon)—Tall growing shrub from 6 to 8 feet. Very effective for group and specimen planting. Blooms freely from Midsummer until frost. Choice of Purple, Red, White and Pink. All double flowering.

BEAUTY BUSH (Kolkwitzia)—Beautiful bell shaped pale pink flowers during June in great profusion. Grows to about 6 feet in height and produces long arching branches. Foliage attractive. **Price—18 to 24 in. 50c each; \$4.50 per 10.**

BUTTERFLY BUSH (Buddleia, Ile de France)—A new variety of more uniform moderate growth. Violet purple clusters bloom in great abundance in mid-summer. Sweet, fragrant. 4 to 5 feet.

DEUTZIA GRACILIS—One of our best low growing, flowering shrubs. White flowers in graceful upright clusters in May and June. 2 feet.

DEUTZIA PRIDE OF ROCHESTER—Grows 5 to 6 feet tall. Beautiful double white flowers tinged with rose in May. One of the best popular shrubs.

FORSYTHIA (Golden Bell)—Branches are literally covered in early spring with golden bell shaped flowers. The finest early blooming shrub. 6 feet.

HONEYSUCKLE, TARTARIAN—In May and June it is covered with charming pink flowers, followed by clusters of red berries. Attains a height of 8 feet.

HYDRANGEA ARBORESCENS (Hills of Snow)—A very beautiful and showy shrub. Ball shaped clusters of pure white flowers from July to September.

HYDRANGEA P. G.—Popular late summer blooming shrub. The immense cone-shaped blooms are white at first then turn pink and bronze. Grows in sun or partial shade and makes a shrub 4 feet tall.

Common Snowball

HYDRANGEA, TREE FORM—The Hydrangea P. G. grown in tree form with a single stem. **Price—3 to 4 ft., 75c each, \$7.00 per 10.**

INDIAN CURRANT (Coralberry or Red Snowberry)—Dwarf shrub of graceful habit. Rose colored blossoms in June and July, followed by dull red coral colored berries.

JAPAN QUINCE (Cydonia Japonica)—Completely covered with dazzling scarlet flowers in May, followed by small quince shaped fruits. Grows 4 to 6 feet tall. No planting is complete without one of these plants.

KERRIA JAPONICA—A medium dwarf shrub with beautiful globe shaped flowers of bright orange during July. The branches are green in winter and therefore showy. Grows 4 to 6 ft.

PLUM, DOUBLE FLOWERING (Prunus Triloba)—Completely covered in May with double rose-like pink flowers. Grows medium tall and succeed everywhere. A very beautiful shrub. **Special Price—3 to 4 ft., 50c each; \$4.50 per 10.**

SPIRAEA ANTHONY WATERER—A crimson flowered dwarf variety. Makes low compact bush never getting higher than 2 feet. Covered with blossoms all Summer. Hardy and adapted to wide range of soils. 18 to 24 inch.

SPIRAEA CALLOSA ALBA—Similar to Anthony Waterer except that it has white flowers.

SPIRAEA THUNBERGI—A graceful shrub with bright green, fine feathery foliage which turns orange scarlet in the fall. Blooms in late April with abundant white flowers that almost cover the branches.

Butterfly Bush

SPIRAEA VAN HOUTTEI (Bridal Wreath)—

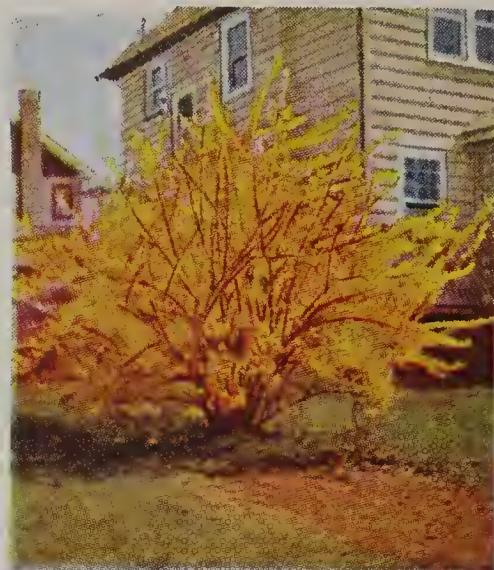

Most popular flowering shrub. Suitable for hedge or specimen planting. White flowers in clusters during May and June. **Price—3 to 4 ft., 20c each, \$1.50 per 10, \$10.00 per 100.**

Spiraea Van Houttei

Honeysuckle

Forsythia, Golden Bell

SNOWBERRY (Symphoricarpos R.)—A well-known shrub with small pink flowers in June, followed with clusters of waxen white berries which remain during winter. Grows about 4 feet tall. Is recommended for shady places.

SNOWBALL (Viburnum Opulus Sterilis)—Globular clusters of white flowers around Decoration Day.

LILAC (Syringa Vulgaris)—The much desired common lilac. Can furnish either the purple or white variety.

RED-LEAVED BARBERRY—A brilliantly colored shrub with its bronzy red leaves all season. Scarlet berries throughout the winter. Likes plenty of sunlight.

SYRINGA CORONARIUS (Mock Orange)—Fragrant creamy white blossoms, slightly scented, in May. Foliage large and oval. Grows to 6 feet.

SYRINGA LEMOINE—Semi-dwarf. Branches literally covered with small white blossoms in early June.

WEIGELIA CANDIDA—Blossoms very profusely from June until fall, with a large showy white flower. Vigorous grower—6 to 8 feet.

WEIGELIA EVA RATHKE—Grows from 3 to 5 feet high. Deep scarlet blossoms in June and intermittently all summer. Very distinctive and attractive.

WEIGELIA ROSEA—One of the choicest of all shrubs. Tall grower with deep pink flowers in profusion in June and throughout summer.

Spirea, Anthony Waterer

Shade and Ornamental Trees

AMERICAN ELM—Tall vase shaped. Fine for street planting. 6 to 8 ft., \$1.00 each, \$8.00 per 10.

BECHTEL'S FLOWERING CRAB—Lawn tree. Medium grower. Double rose shaped pink blossoms. 3 to 4 ft., 80c each, \$7.00 per 10.

GOLD BARK WILLOW—An upright growing tree with showy golden bark conspicuous during the Winter. **Price**—6 to 8 ft., 50c each.

PUSSY WILLOW—Small trees 15 to 20 ft. high with catkins that appear before the leaves in the spring. 6 to 8 ft., 50c each.

NORWAY MAPLE—Excellent street and shade tree. Strong, fast grower. 8 to 10 ft., \$1.75 each; 10 to 12 ft., \$2.25 each.

CAROLINA POPLAR—Hardy, fast growing tree with large leaves. 6 to 8 ft., 50c each, \$4.50 per 10.

CATALPA BUNGEI (Umbrella Tree)—Large, heart-shaped leaves making symmetrical umbrella shaped top. Two year heads. 6 to 8 ft., 95c each.

CHINESE ELM—A very rapid grower with small dense foliage. Resembles Norway Maple in shape. 8 to 10 ft., \$1.50 each; 6 to 8 ft., \$1.15 each.

CUT-LEAVED WEEPING BIRCH—Tall, slender, weeping tree. Silvery white bark. 6 to 8 ft., \$2.00 each.

JAPANESE FLOWERING CRAB (Malus Floribunda purpurea)—Purplish foliage, bark tinged with red. Large flowers of deep pink. Very hardy. 3 to 4 ft., 75c each.

LOMBARDY POPLAR—Tall, fast growing spire-like tree. Fine for marking lanes or boundaries. 8 to 10 ft., 75c each, \$7.00 per 10; 6 to 8 ft., 60c each, \$5.50 per 10.

MOUNTAIN ASH—Handsome small tree with clusters of bright red berries. 5 to 6 ft., \$1.25 each.

Chinese Elm

RUSSIAN MULBERRY—Low growing, hardy lawn tree with medium size black berries. 5 to 6 ft., 65c each, \$5.50 per 10.

SILVER-LEAVED MAPLE—Large spreading tree. Foliage silvery underneath. 8 to 10 ft., \$1.00 each.

ORIENTAL PLANE (European Sycamore)—A rapid growing, lofty, wide spreading tree. Very desirable for street planting. 8 to 10 ft., \$1.75 each; 10 to 12 ft., \$2.25 each.

WEEPING WILLOW (Babylon)—One of the best of the weeping types. Grows to about 30 ft. with pendulous branches that sweep the soil. 6 to 8 ft., \$1.25 each, \$10.00 per 10.

Catalpa Bungei

Japanese Flowering Crab

1. Pyramidal Arborvitae. 2. American Arborvitae. 3. Pfitzer's Juniper. 4. Mugho Pine.

Evergreens

Evergreens are the aristocrats of the home grounds, and we highly recommend their use for home plantings. Our evergreens are all fresh dug with the roots balled in rich soil.

AMERICAN ARBORVITAE (White Cedar)— Soft bright green foliage. Erect, broadly pyramidal habit—a rapid grower. Can be trimmed and kept to any form or height. **Price**—**2½ to 3 ft., \$1.00 each.**

GLOBE ARBORVITAE—A dense, low, natural globe shaped evergreen, excellent for foundation planting or planting along walks or driveways. **Price**—**15 to 18 in., 90c each.**

PYRAMIDAL ARBORVITAE—A densely compact pyramidal type with deep green foliage. The most popular columnar type for home beautification. **Price**—**2½ to 3 ft., \$1.25 each.**

IRISH JUNIPER—A splendid columnar shaped evergreen with fine sage green foliage. Erect, compact, slender and formal in habit. **Price**—**2½ to 3 ft., \$1.50 each.**

MUGHO PINE—A genuine Dwarf Pine. Very dense. Assumes a general globular form. Leaves, short, stiff and rich green color. Fine for punctuating walls and driveways and for foundation planting. **Price**—**15 to 18 in., \$1.50 each.**

PFITZER'S JUNIPER—A striking, low growing, spreading evergreen, with fine dark green foliage. Fine for foundation and general purpose planting. **Price**—**18 to 24 in., \$1.50 each.**

COLORADO BLUE SPRUCE—One of the showiest and most impressive evergreens. A broad pyramidal shaped tree with beautiful foliage of bright silvery blue color. **Price**—**2½ to 3 ft., \$2.00 each.**

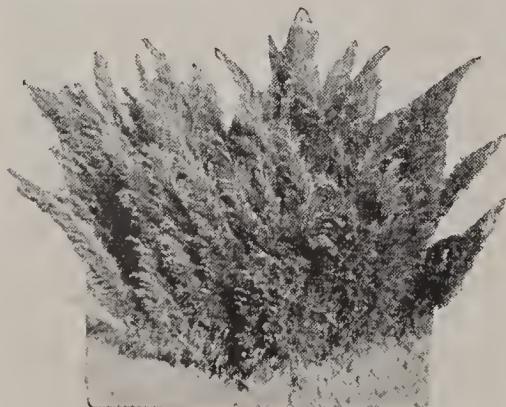

NORWAY SPRUCE—The evergreen most commonly used for Christmas trees. Tall, open, pyramidal shaped tree with dark green foliage. Can be kept trimmed to any size or shape. **Price**—**2½ to 3 ft., \$1.00 each.**

SAVIN JUNIPER—Low growing, very dwarf. Dark green foliage, very desirable. Can be kept trimmed to any desired height. **Price**—**18 to 24 in., \$1.50 each.**

COLORADO GREEN—Similar to Colorado Blue but range in color from green to light blue. Very showy. **2½ to 3 ft., \$1.00 each.**

SPINY GREEK JUNIPER—Attractive dwarf pyramidal tree with compact bluish green foliage. **18 to 24 in., \$1.25 each.**

PURPLE SPREADING JUNIPER—A very attractive low growing evergreen with silvery foliage that assumes a purplish cast in fall and winter. **18 to 24 in., \$1.00 each.**

Savin's Juniper

Kelly Bros. Nurseries,
Dansville, N. Y.

Gentlemen:

This is the third order we have sent you this Spring. Am very proud of my trees.

BARBERRY THUNBERGI—Best for informal hedge 2 to 3 ft. high. Plant 2 feet apart. Extra strong bushes, 2 to 3 ft. high. **30c each, \$2.25 per 10, \$20.00 per 100.** Strong bushes, 18 to 24 inches high, **25c each, \$2.00 per 10, \$18.00 per 100.**

CALIFORNIA PRIVET—Best trimmed hedge 3 to 5 ft. high. Set in single row 10 inches apart. If broad hedge is desired plant in double rows—rows 1 foot apart and bushes 1 foot apart in each row, but staggered so as to come 6 inches apart in hedge. Strong bushes, 2 to 3 ft. high, **\$1.00 per 10, \$5.00 per 100.** Extra strong bushes, 3 to 4 ft. high, **\$1.25 per 10, \$7.00 per 100.**

AMOOR RIVER PRIVET—A hardy vigorous grower recommended for sections too cold for California Privet. Strong bushes, 18 to 24 in., **\$1.00 per 10, \$8.00 per 100.**

OUR NURSERY STOCK

Our nursery stock has the reputation of being the **BEST** that can be grown, and it is our aim to keep it up to the standard in every way. **THE BEST IS ALWAYS THE CHEAPEST.** It is not what you pay, but what you get, that makes the bargain. Every purchase will prove to you the value of buying stock from us.

Barberry Hedge

E. G. Hill

Golden Dawn

AMI QUINARD—Blackish maroon buds opening into flowers of rich velvety red. Strong grower and fine producer.

AUTUMN—Burnt orange, streaked with red. Very active bloomer.

BETTY UPRICHARD—Two tone salmon and carmine. Very fragrant and a constant bloomer.

C. K. DOUGLAS—Bright crimson scarlet. Healthy, bushy grower.

DAME EDITH HELEN—Clear pink. Very large double, fragrant bloom on long stem.

ETOILE DE FRANCE—Large double blooms of rich velvety crimson.

E. G. HILL—Dazzling scarlet, toning to deep red. Fragrant blooms on long stems.

ETOILE DE HOLLANDE—The star of all red roses. Brilliant dark red. Stems almost thornless and foliage healthy.

FRAU KARL DRUSCHKI (Hybrid Perpetual)—The White American Beauty. Pure snow white. Vigorous grower and continuous bloomer.

Padre

Pres. Herbert Hoover

GRUSS AN TEPLITZ—Dark rich crimson, changing to velvety fiery red. An exceptionally free bloomer.

GOLDEN DAWN—Sunflower yellow with buds touched with carmine. Prolific bloomer.

K. A. VIKTORIA—Soft, pearly white shading to cream. One of the best white roses.

MARGARET McGREDY—Large, double brilliant red petals with tinge of yellow at base. Profuse bloomer.

Hardy Climbing Roses

PRICE—40c Each, 10 for \$3.50

Paul's Scarlet

A few climbing roses will add much to the attractiveness of your home.

APELES MESTRES—Clear yellow, full double flowers of large size.

CLIMBING AMERICAN BEAUTY—Crimson. Large fragrant flowers of fine form, borne in clusters. Blooms early.

DOROTHY PERKINS—Large clusters of double shell pink blossoms.

DR. W. VAN FLEET—Shows a mass of beautiful clustered buds which open in large shapely flowers. Delicate flesh white.

PAUL'S SCARLET CLIMBER—Large brilliant scarlet flowers. Excellent for pillars.

PRIMROSE—A pure yellow hardy climber. Full flower on long stem.

SILVER MOON—Creamy white, large semi-double flowers. Vigorous grower. Blooms in midseason.

SPANISH BEAUTY—Pearl-pink, splashed with red. One of the most attractive climbers. Blooms early.

POLYANTHUS OR BABY RAMBLERS

PRICE—40c Each, 10 for \$3.50

This group includes the dwarf bushy, everblooming cluster types that add color to the garden all year. Effective in solid beds or for borders.

BELVEDERE—Dark crimson. Large double blooms and vigorous bushy grower.

GLORIA MUNDI—Orange scarlet. Large semi-double. Very popular.

DISTANCES FOR PLANTING

Standard Apples	40 feet apart each way

Helpful Suggestions to Planters Setting Out Young Trees

Prepare rich, deep bed of mellow soil and have the land sufficiently drained to relieve the roots from standing water. To insure a fine growth, land should be in as good condition as is required for a crop of corn, wheat or potatoes.

We use great care in digging and packing, but the loss of some small roots and fibres is unavoidable. If stock is properly prepared before it is planted, no permanent injury will result from this. The preservation of the natural balance between top and roots renders a vigorous cutting back of the

former absolutely necessary in most cases. Therefore, prune off broken ends of roots (a smooth cutting root granulates and extends sooner than one broken off), cut back the tops to the extent of one-half the previous season's growth taking care at all times to prune in such a manner as will tend to develop a head sufficiently open to admit air and light freely.

Evergreen and other ornamental trees should be pruned very little. If not ready to plant when the stock arrives, place roots in a trench and cover them with mellow earth well packed.

Planting and Mulching and After Culture

Make the holes large enough to admit the roots without any cramping and deep enough to bring the tree to its natural depth. The fine surface soil should be used in covering the roots and this should be carefully worked among them.

If the ground is dry, it is well to pour in some water when the hole is partially filled. See that the ground is firmly and solidly packed over all parts of the roots by exerting the full weight of the planter upon it so that there will be no opportunity for dry air or frost to enter and destroy roots deprived of their natural protection. Failure to pack the earth solidly is a most frequent cause of failure in the planting of nursery stock. Fill the holes full enough

to be even with the surrounding surface as the fresh earth settles.

Always remove the label when planting. If this is left until tree is grown the connecting wire often cuts into and destroys the tree or branch to which it may be attached.

When planting dwarf trees, set them low enough to cover the stock upon which they are budded, three or four inches. When trees or bushes are planted they should be mulched, or covered with a layer of coarse manure or litter from three to six inches deep for a space of about two feet more in diameter than the roots extend. This keeps the earth moist and at an even temperature.

A picture of our large, modern, frost-proof packing house where all trees are carefully graded, packed and shipped. We have a private switch right to this packing house so there is no excuse for our trees and plants to be exposed before they leave our hands and we guarantee that they will carry safely through to destination with our careful method of packing.
